

Trabzon (Turkey): New Hydroelectric Power Plant Büyükdüz

Committente

Ayen Energy Co. Inc., Ankara / Turkey

Progettazione

IM Maggia Engineering Ltd

Realizzazione

2008-2012

Costo dell'opera

€ 80 million

Prestazioni

Feasibility study, construction design, tender documents, realisation and project supervision, workshop tests, general site supervision

Descrizione

New construction of a hydroelectric power plant on the Elmali and Tasoba rivers in northeast Turkey (Trabzon region). Construction of two reservoirs for daily compensation with intakes and fish pass, connection galleries, surge tank and forebay, penstock, powerhouse, switchyard and transmission line.

Dati principali

- 2 reservoirs, intakes and desanders on the Elmali and Tasoba rivers with fish pass
- Gallery lengthtotal = 12 km, Ø 4 m
- Surge tank with forebay
- Penstock DN2000, L = 1690 m in welded steel
- Powerhouse:
 - QA = 16 m³/s
 - HN = 500 m
 - PA = 70 MW
- 2 6-jet vertical Pelton turbines
- 2 spherical valves DN1000, PN64
- 2 generators 35 MVA
- 2 closed circuit cooling water systems
- 2 transformer units
- Switchyard
